Art Unit: 1764

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method for separating difluoromethane from a mixture containing same, classified in class 203, subclass 67.
 - II. Claims 12-16, drawn to a method for preparing a fluorinated compound, classified in class 570, subclass 178.
 - III. Claims 17-19, drawn to a system for preparing a fluorinated compound, classified in class 422, subclass 243.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I & II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practise another and materially different process such as that described e.g., at page 2, lines 3-9 in the instant specification. .
3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions have different modes of operation e.g., separating an already prepared mixture in Group I invention as opposed to preparing the mixture from raw material in Group II invention.
